Program Licensed by: HEGL Henmi Educational General Laboratory, Tokyo, Japan.

Operation Hour: Wed-Fri 10 am - 7 pm, Sat 9.30 am - 7 pm, Sun 9.30- 3.30 pm. Close on Mon, Tue and public holiday.

# Unleashing the GENIUS within your child through The Heguru Method.

Heguru Method - The 'Right Brain' that produces results.

The right brain holds the key to improving one's potential abilities. Once activated, the memory power, wave reading, comprehension and creativity skills are greatly enhanced. It has also shown to improve a child's sporting and artistic skills.

The Heguru Method programmes are created to unearth the unknown potential of the right brain. As the method has shown results, it has attracted thousands of children all over Japan.

Achieving one's potential ability by greatly enhancing the IQ.

Chart A shows the normal children's IQ distribution in Japan

From the chart, you can see the effectiveness of Heguru's 'Total Foundation Ability Development' in improving the IQ.

An IQ is calculated with 100 as the mean; An IQ of '80' is the threshold for a special class. '120' borders the top class and '140' is said to be required for passing the entrance exam for Tokyo University.

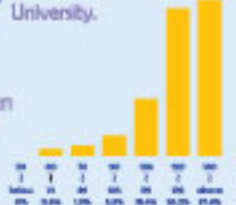

Chart B shows the Heguru Student's IQ distribution in Japan

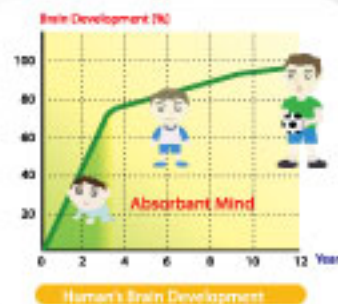

A programme for children with an emphasis on character building (Heart Education)

The Heguru Method believes that an education should also focus on character building. It emphasizes on learning in a supportive environment where children are praised, acknowledged and encouraged in a positive manner. This is to condition the child to be a caring and loving individual with a positive attitude towards life. The "Heart Education" is incorporated into their lessons, even for the unborn child, to mould them into a happy and dynamic child.

## Bringing out the greatest potential of your children

The peak period of a child's brain development is from birth to the age of 6. During this crucial period, the brain develops by absorbing the influence from its surrounding environment. Hence the usage of the correct stimulation will enable the child to develop the right brain to its full potential, reaching a level that surpassed the general brain utilization of 3%. The balanced interaction of the right and left brain will allow your child to achieve outstanding academic performance and excel in other undertaken endeavours.

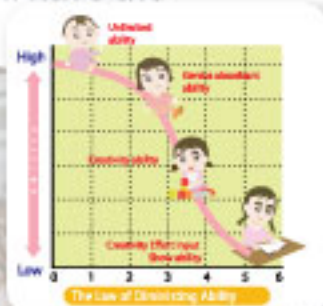

## The developed 'Right Brain Strengthens the innate Abilities

Our learning ability decreases as we grow older. However, based on the chart, the learning ability of an average child decreases significantly from birth to the age of 6. The chart also shows that there are 4 learning stages which require 4 different teaching methods. The key to develop these abilities to the fullest is to develop the right brain at the earliest age possible.

A well developed right brain will have the below capabilities:

- ✓ Photographic memory
- ✓ Speed reading skills
- ✓ Analytical skills
- ✓ Innovative and Creative skills
- ✓ Sensitive to the needs of others

A developed right brain will enable a child to lead a better life.

## The "Right" and "Left" Brain

The functions of the right and left brain are completely different.

Unlike the left brain which functions as the reasoning brain, the right brain acts as the "Image Brain". The unlimited wealth of the right brain will be revealed once the sub-conscious mind is activated. The maximum potential in your child can be drawn out by the Heguru's proven method.

'Development of potential abilities means to activate the genes that are asleep within the individual. Heguru education founded by Mr. and Mrs. Henmi is an epoch making method that shows how to activate the genes' - Quoted Dr Kazuo Murakami'

The founder Mr & Mrs Henmi

**Dr Kazuo Murakami**

(Authority of Genetic Engineering Professor Emeritus, Tsukuba University)

He is currently the advisor of Heguru Program, Japan since Feb 2002 .

# Unleashing the GENIUS within your child through The Heguru Method.

## The Formula

The programme is the result of 25 years of research and the method has been proven to be effective in enhancing a child's learning abilities. It encompasses all areas of study, from the academic to arts and sports and character building. Heguru Method has attracted thousands of students in Japan and for the first time, it is now available in Malaysia.

Following abilities will be developed under Heguru's program

comprehension skill  
memory skill  
analysing skill  
innovative & creativity

The improvement in these abilities has been demonstrated in children who have undergone the Heguru Method program.

Excellent results in the academic, sports, music, arts and others.

## The Programmes

### Infant & Toddler Class (6 months - 3 years old)

Tapping the potential of the right brain while improving the communication skills between parents and children.

60 min/class, 43 lessons per year

### Pre-School Class (4 - 6 years old)

Connecting the left and right brain to create the foundation for developing the right brain.

60 - 75 min/class, 43 lessons per year

### Elementary Class (7 - 12 years old)

By developing a child's right brain, it will also develop his/her positive outlook in life and enhance his/her personality.

75 min/class, 43 lessons per year

### Prenatal Program

(from the 4th month of pregnancy onwards)

Strengthen the bond between the mother and her unborn child.

4 classes/program

Not available at the moment

## Record of Japan TV appearance..

\* TV Tokyo Nationwide 12 networks - 'Navigator 94' (23, September 1994)
